

## InstantPass

### What is it?

InstantPass is a plug and play biometric fingerprint verification system that offers unparalleled security for access control. It uses templates stored in a database to provide personal proof that people entering a premise are who they claim to be. InstantPass is convenient, fast, accurate, easy to implement and extremely cost effective.

### Functions

InstantPass is a physical access control system based on fingerscan, the most popular and cost-effective biometric technology. An entrance equipped with InstantPass system allows only authorized users, who will be identified and verified by his/her fingerprints, to pass through. The times and activities are logged for record to further enhance the security level. Reports can be produced for management control.

### Advantage

Compared with existing physical access control system, InstantPass have the following competitive advantages:

- **Highly Secure** : Any visitor is verified by his/her fingerscan, which cannot be reproduced. Unauthorized persons will not be able to break into the protected area by knowing others' password or by stealing others' opening devices, e.g. keys, smart card, etc.
- **Convenient** : User need not remember any password or bring along with any opening devices. Besides, the operation to add or remove a user from the authorization list is simple.
- **Low Running Cost** : No physical entity need to be reproduced for an additional user to be authorized to the system and the long-term running cost is minimal.

## InstantPass

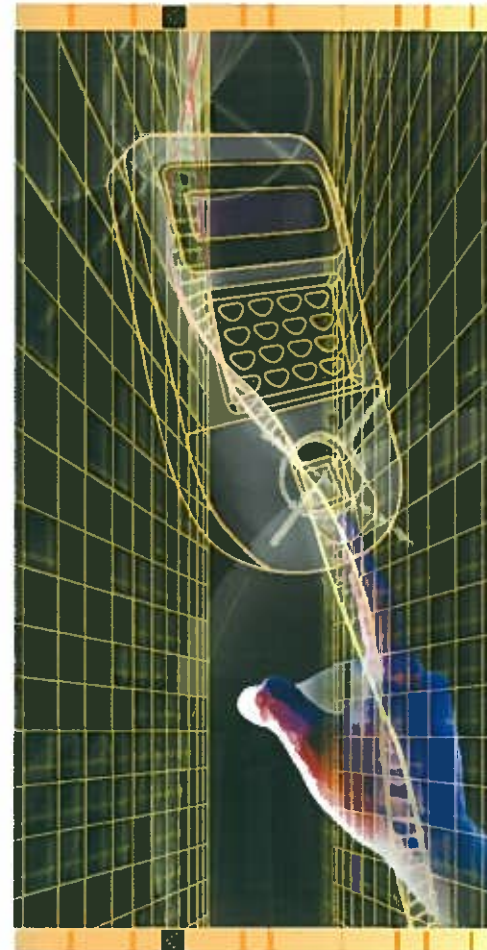

### Features and Characteristics:

InstantPassV2.1 Fingerprint Access Control:

- Easy** : Grant access by just place the finger on the sensor.
- Convenient** : Do not require additional hardware key, IC card and etc.
- Safe** : Recognition base on human unique fingerprint
- High performance** : Only need 1 second for recognition
- False Acceptance Rate (FAR) : below 0.001% (0% for 1 : 1 mode)
- False Rejection Rate (FRR) : below 1%
- Number of fingerprint stored (for 1 : N mode) : 100
- Number of fingerprint stored (for 1 : 1 mode) : 750
- Temperature : -15°C – 60°C

### Applicable Locations

- Accommodation apartments and gardens
- Small internal area for entry admittance
- Lift area and specific highly secured region
- Bank area and Safe bank
- Treasury, machine room and warehouse
- Armory and military restricted region
- Hotel room management
- Airport restricted area
- Museum and exhibition center
- Control center and data center
- Other special area (e.g. nuclear factory, electric company and jail)

# Fingerprint Attendance System

## Easy Operation and Accurate :

- Fingerprint biometric authentication to avoid cheats
- Low running cost
- Handle multiple shifts, reverse shifts, overtime and leave application by using Attendance System software
- Generate various monthly statistical reports
- Network support: allows standalone and network version
- User friendly operation
- Standard and enterprised version are available to suit for different needs

# Fingerprint Attendance System

## Characteristics

- Lightweight with hook-on-wall design, strong and reliable
- Independent operation without connected to personal computer
- Can store up to 750 fingerprint and 16,000 attendance records
- 16 key buttons for password entry of administrator and other users
- Accurate and reliable attendance records
- Avoids loss of keys or cards, avoids cheats
- False Acceptance Rate (FAR) : below 0.001%
- False Rejection Rate (FRR) : below 1%
- Number of fingerprint stored (for 1 : N mode) : 100
- Number of fingerprint stored (for 1 : 1 mode) : 750
- Temperature : -15°C – 60°C

## Application area

- Finance institutes
- Enterprise units
- Deluxe office area
- Factories
- Hotels
- Hospitals
